TRANS-DATA 40-COLUMN MINI PRINTER

The Trans-Data 40-column, dot matrix, 12-volt, mini printer captures multiple or individual transactions as furnished by one of two Trans-Data M-2000 Meter RS-232 ports.

This rugged compact printer measures 4.55" W x 7" L x 3.5" H. Size includes paper roll and cable connector plug.

Paper roll is secured to case by tamper proof hold down brackets.

User friendly paper roll and ribbon replacement when done by maintenance or authorized personnel.

The printer operates on 1200 baud rate and comes with a 30 inch cable that connects to a 25-pin receptor located on the back of the printer and to a RS-232 communication port and power connector on the meter.
